

# Weekly Work Activity Report

Title: Dominguez Channel Oil Spill

Location: Youngstown Lateral area to Collection Area (Leeds Ave./Grant St.)  
Wilmington, California

Reporting Period: February 13, 2012 – February 19, 2012

Distribution: Jason Musante – EPA, Larry Alexander – Crimson Pipeline

## **Activity:**

- 1) NRC is continuing with monitoring of the collection system at Grant Street and Leeds Avenue. No significant storm events occurred during the reporting period.
- 2) Crimson's consultants are continuing to discharge stored water from the Baker tanks at the Collection Area. Water discharge is up to 50,000 gallons per day. The Baker tanks used to store water are being emptied, cleaned, and demobilized from the site. It is estimated that this work will be completed during the week of February 27, 2012. Two Baker tanks will remain onsite for future use as required.
- 3) Recovery of fluids from the wells placed within the French drain system is continuing on Thursdays from 7:00 to 12:00 pm. Crimson has requested from ACTA to extend the weekly recovery operations for an additional 5 weeks. The first 5 week period ended on February 9<sup>th</sup>. The operations will resume on February 23, 2012.
- 4) No other activities were performed during the reporting period.
- 5) Crimson consultants are in the process of preparing reports for the site investigation work completed through December 31, 2011.

## **Equipment:**

K-rails, sandbags, Baker tanks and spill response supplies in place at the Collection Area. NRC continuing to maintain equipment and monitor the outfall for any discharge.

## **Future Work:**

Weekly fluid recovery/inspection will continue from the recovery wells. Collection Area will be monitored for discharge from French drain outfall. Recovered water stored in Baker tanks at the Collection Area will be discharged to L.A. City sewer system. Preparation of site investigation reports is continuing.
